

HW 6 Due on Mar 11

5.9, 5.10, 6.2, 6.3, 6.4, 6.5

For 5.9, it was actually assigned for HW 5, so you don't have to do it. But remember the B field we should use for P_{cyc} is the internal magnetic field, not the B_0 as external field, as explained by Dr. Miley during class.

Assignments:

Read chapter 6 up to 6.4, P 484 to 490 of G&L book (Chap 13) on the class web.
